Boris Karasek

FRONTEND DEVELOPER

karasekboris.vercel.app

DETAILS

Janka Cmelika 13, Belgrade,
Republic of Serbia
+38164929789
karasekboris@gmail.com
github.com/boris-karasek

SKILLS

Frontend & Mobile

React · React Native · Expo
JavaScript · TypeScript
HTML / CSS · Tailwind CSS

Tools & Backend

Firebase · Express · Electron
SQLite · Git · Linux

Testing & CI

Jest · Vitest · GitHub Actions

AI-Assisted Development

Claude Code

COURSES

React – The Complete Guide
Udemy, 2024

React Native – The Practical Guide
Udemy, 2025

HOBBIES

Guitar – played in a cover band (2015–2017)

Carpentry, reading, swimming, hiking, motorcycle adventure riding

LANGUAGES

English
Slovak

Profile

Front-end developer transitioning from aviation operations, with hands-on experience building web, desktop and mobile apps in React, React Native and TypeScript. I bring a strong IT background along with a proven ability to adapt and solve complex problems.

Projects

MojiDokumenti – Secure Document Expiry Tracker (github.com/boris-karasek/MojiDokumenti)
Graduation project · *in progress*

- Building a React Native (Expo, TypeScript) app that scans passports and ID cards with on-device OCR (ML Kit) and reminds users before documents expire
- Implemented on-device AES-256-GCM encryption with the key in Keystore/Keychain; only structured data is stored, never document images
- Added biometric app lock with passcode fallback and local expiry reminders with deep links
- Wrote an OCR normalization layer for ICAO 9303 MRZ parsing and a Node.js CLI tool that generates synthetic, checksum-valid test data
- Covered core logic with 60+ Jest unit tests and set up GitHub Actions CI that runs type checks and tests on every push and pull request

Technologies: React Native, Expo, TypeScript, SQLite, ML Kit, Jest, Vitest, GitHub Actions

MyInvoice – Mobile Invoicing App (github.com/boris-karasek/myInvoice/releases/tag/v1.0)

- Built a full-stack invoicing app using React Native, Firebase, and Google OAuth for secure authentication
- Implemented PDF invoice generation and export with a streamlined UI for mobile and desktop
- Developed a cross-platform Electron desktop interface with a lightweight Express server handling the Google OAuth redirect flow

Technologies: React Native, Firebase, Electron, Git, JavaScript, Express

Portfolio Website (karasekboris.vercel.app)

- Designed and built a portfolio site with smooth custom scroll and interaction animations
- Built fully responsive across desktop and mobile devices

Technologies: React, JavaScript, CSS animations, Tailwind CSS

Boki-Edi – Responsive Business Website (boki-edi.com)

- Built a company website showcasing services, with a clean UI optimized for all devices
- Deployed on a custom domain with performance and SEO improvements

Technologies: React, JavaScript, Tailwind CSS, HTML

Employment History

Flight Dispatch Assistant at ImperialJet, Belgrade
2022 — 2025

- Managed crew scheduling and operational logistics in a high-responsibility environment, ensuring on-time operations and smooth coordination across teams
- Improved efficiency by refining crew training and safety check processes, contributing to stronger compliance and more reliable performance
- Handled pilot per diem administration and introduced an automation process that reduced manual work and minimized errors
- Worked closely with flight crews and operations staff to align resources with daily demands

Logistics Operator at Pro Team, Belgrade
2014 — 2020

- Optimized warehouse logistics through commissioning, goods handling and team coordination

Education

Faculty of Information Technologies, Alfa BK University, Belgrade
2025 — Present · 4th Year

- Transferred from Postal Traffic and Information Systems, Faculty of Transport and Traffic Engineering, Belgrade (2015 — 2022)

Computer Network Administrator, Vocational School of Electrical Engineering "Nikola Tesla", Belgrade
2009 — 2013
